

Asian American and Native Hawaiian and Other Pacific Islander (NHPI) Population

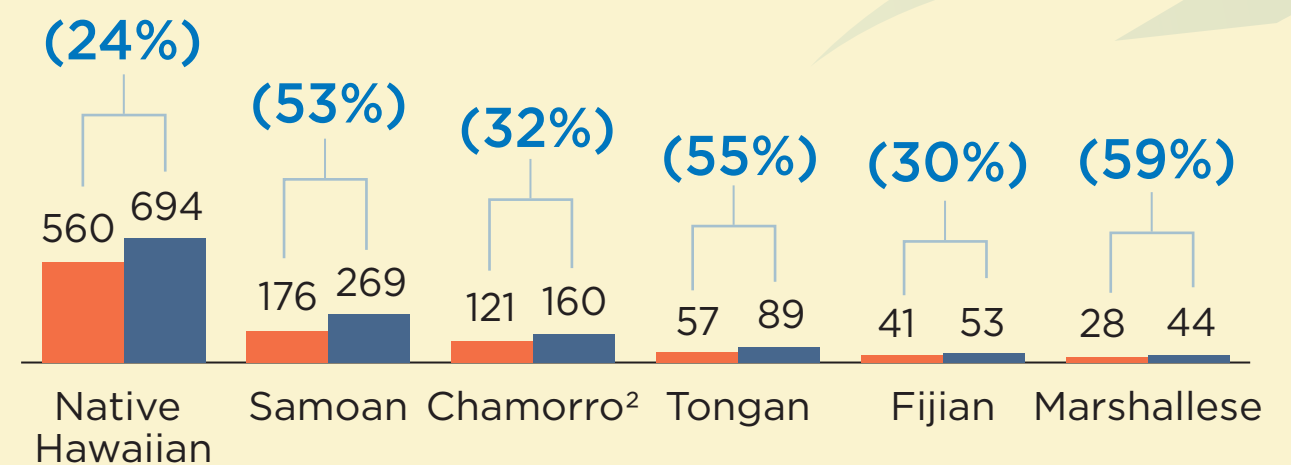

Population and Percent Change Between 2013 and 2023

2013 2023

Top 6 Asian Groups
(In millions)

Top 6 NHPI Groups
(In thousands)

¹ The 2013 American Community Survey (ACS) estimate for the Asian Indian population includes respondents who provided a response of Sikh. In 2020, a new code was added for Sikh and responses of Sikh were disaggregated from the Asian Indian estimate. Caution should be used when comparing the Asian Indian estimate in 2013 and 2023.

² The 2013 ACS estimate for the Chamorro population includes respondents who selected the "Guamanian or Chamorro" checkbox or who wrote in responses of Guamanian and/or Chamorro. In 2020, the checkbox was revised from "Guamanian or Chamorro" to "Chamorro." The Chamorro estimate only includes respondents who selected the "Chamorro" checkbox or wrote in "Chamorro." Caution should be used when comparing the Chamorro estimate in 2013 and 2023.

Notes: The percent change in population is based on unrounded estimates. These estimates represent the race alone or in any combination population which includes those who reported one detailed response, such as Korean, and those who reported multiple responses, such as Korean and Vietnamese or Korean and Black or African American.

Beginning in 2020, any data comparisons to prior race estimates should be made with caution, taking into account the improvements made to the race question and the ways we code what people tell us. For more information, refer to the [ACS Race User Note: Improvements to the Race Question](#).
